PLAYAS - IEO

31 de agosto

Hoy os dejamos una imagen que visualiza parte de la predicción que esperamos para mañana sábado. Las flechas blancas son la corriente a 1 m de profundidad, los polígonos rojos son remolinos (eddies) que giran en sentido de las agujas del del...Ver más

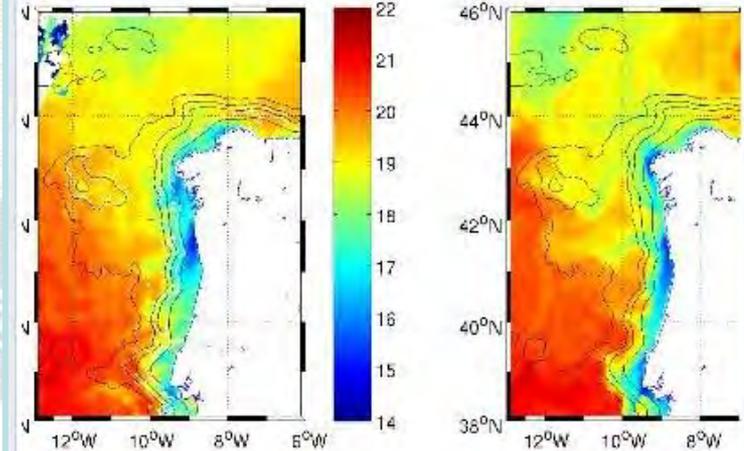

PLAYAS - IEO

26 de Julio

¿Quién es quién?

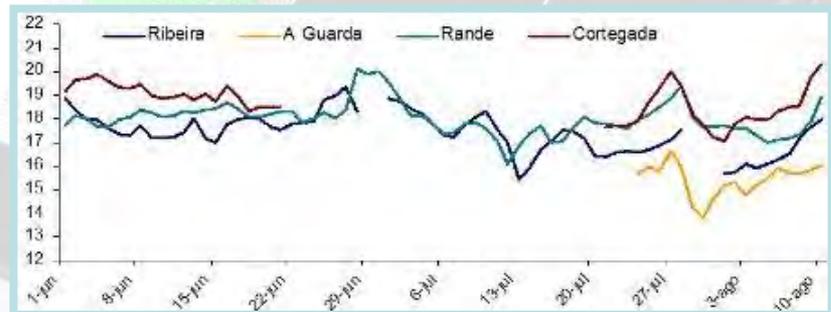

En la imagen mostramos la temperatura superficial del modelo del pasado lunes 23 de julio y su comparación con las observaciones de satélite. Hay varias pistas que te permitirán descubrir quién es quién.

Use the current “state-of-the-art” to **BUILD**
new things. We can do it and it’s fun!

Think in your **PUBLIC**. Social nets may
help!

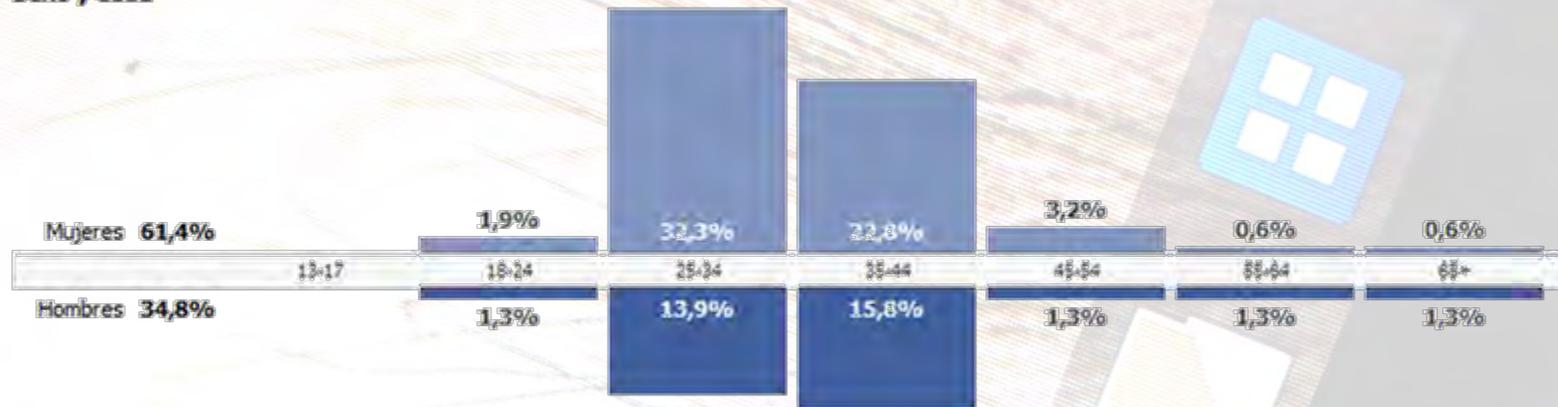

See you at the beach!
